## DEDICATION

The show committee of the Franklin Mineral Museum takes great pleasure in dedicating this bulletin of the Franklin-Sterling Gem and Mineral Exhibit for 1994 to the Warinsky duo. To mention one before the other is to simply imply an imbalance which does not exist. Never were there two people more evenly matched in kindness, in enthusiasm, in generosity, in dedication and in loyal support of each other. How then can we say Joe and Helen when we intend equally to say Helen and Joe? In our thoughts they are inseparable as they have been in the mineral hobby and throughout their married life. Our love for the two of them is enhanced when we recall how Joe looks after Helen and Helen worries about Joe. Helen's pursuit of brookite crystals in which the usually elusive mineral was no match for her determination endears her to all as does her generosity with numerous micromount specimens including local gold. Joe's skill and dedication in polishing difficult minerals have placed many in his debt. Their participation in the affairs of numerous mineral societies has greatly aided those organizations, as for instance the Franklin micromount group which sadly misses the Warinsky leadership. The good humor which these dear friends have shared with us so many years suggests that Helen will respond in kind and Joe will ask, not too seriously, whether these sentiments will help his flowers grow. To both we say thank you for a wonderful association and may it long continue.

## Fluorescent Minerals of Franklin and Sterling Hill, N.J

A 1994 CHECK-LIST BASED ON OBSERVATIONS BY RICHARD C. BOSTWICK

*FL = fluoresces; PH = phosphoresces; SW = shortwave ultraviolet radiation;  
LW = longwave ultraviolet radiation*

These descriptions are necessarily brief and hence simplistic. the ultraviolet wavelength (SW or LW) listed with a fluorescent response is the wavelength for which the response is stronger; many listed minerals fluoresce under both LW and SW. Unusual fluorescent responses are listed in parentheses. Fluorescent intensity and subtle differences in hue are not mentioned.

While mineral fluorescence is a powerful tool for rapid mineral identification, it should be used in conjunction with other identification techniques.

## WHEN YOU THINK OF QUALITY, THINK OF UV SYSTEMS

UV SYSTEMS provides quality hardware and services to fluorescent mineral collectors and mineral museums. Listed below are our most popular products.

- \* **Short Wave Replacement Filters.** Bring back the richness of the inherent color in your fluorescent minerals with a new SW filter. We stock exclusively Hoya Optics U-325C filters, rated the best by the 1990 *Journal of the Fluorescent Mineral Society*. Sizes to fit virtually all makes/models of UV lights.
- \* **Replacement UV Lamps.** Because SW UV lamps (also called bulbs or tubes) solarize, the amount of transmitted UV light decreases over time. See what you've been missing with a replacement SW lamp. We provide replacement SW (germicidal) and LW (blacklight) lamps.
- \* **Clear UV Goggles.** Protect your eyes. These goggles will do it by absorbing all UV light while transmitting all the visible fluorescent colors.
- \* **Custom Mineral Labels.** Give your mineral display a professional look with these laser-printed, affordable labels. Both fluorescent and non-fluorescent styles are available.
- \* **UV Radiometer Rental.** Determine exactly the condition of your SW filters, SW lamps and LW lamps. This is the most economical - and reliable - way to do it.

## Franklin Mineral Museum's Endowment Fund and Building Fund

The Board of Trustees realized that the continued financial and educational success of the mineral museum was dependent upon two long term projects when they established an Endowment Fund and a Building Fund.

**The Endowment Fund** accepts monies from estates, trusts and the general public. Only the income from the Endowment Fund is used to operate the museum. The principal of the Endowment Fund is restructured from any distribution to museum support or expansions.

**The Building Fund** also accepts monies from estates, trusts and the general public for use in expansion and maintenance of its buildings. Monies received by the Building Fund are restructured for its stated purpose and not for general operations.

Donations to either of these funds can be made out to the Franklin Mineral Museum and mailed to P.O. Box 54, Franklin, New Jersey 07416. Please indicate which of the funds the donations is for if you have a preference.

The trustees sincerely appreciate your support of the permanent preservation of the mineral history of the zinc mines of Franklin, New Jersey.

---

*All donations to the Endowment Fund and Building Fund are tax deductible.*
